What Do You Think?

Name	Date
<u>Directions</u> : Read the qu	estion and answer based on the information you learned in clas
Think about what you learned about today in class. What are the functions of the uring system? What organs filter blood and waste so that our body does not fill with toxing What is the medical term for "pee"? What is our pee made up of? How much urine can the bladder hold? What is dialysis? Why would someone need dialysis?
