

# Our Lymphatic System

1) The lymphatic system helps to filter out:

\_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_, and \_\_\_\_\_.

2) The three major groups of lymph nodes are:

\_\_\_\_\_ (found in the neck)

\_\_\_\_\_ (found in the armpits)

\_\_\_\_\_ (found in the groin)

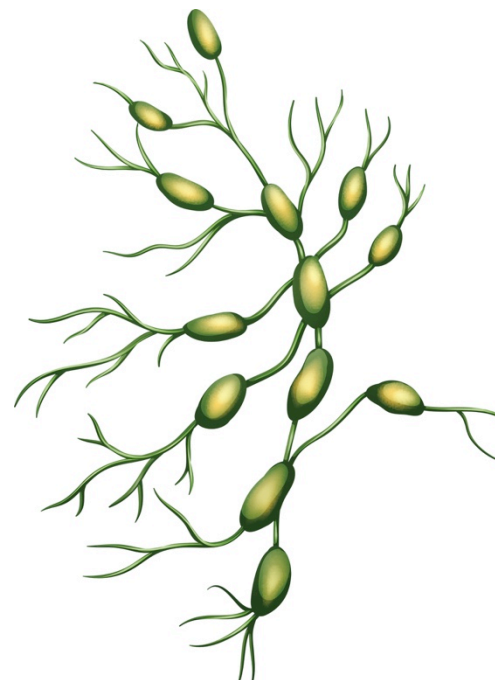

3) The lymphatic system helps to keep \_\_\_\_\_ levels balanced. It also helps to defend against \_\_\_\_\_.

4) \_\_\_\_\_: a clear, watery fluid that contains protein, salt, glucose, urea, and other substances.

5)The spleen is located \_\_\_\_\_ the ribcage in the upper \_\_\_\_\_ part of the abdomen. It helps to clean out \_\_\_\_\_ red-blood cells and foreign substances.

6)The lymphatic system helps to fight against \_\_\_\_\_ and bacteria.

7)\_\_\_\_\_ : mass of tissue that contains lymphocytes (white blood cells).

# Our Lymphatic System

1) The lymphatic system helps to filter out:

**waste, bacteria, or foreign substances.**

2) The three major groups of lymph nodes are:

**Cervical** (found in the neck)

**Axillary** (found in the armpits)

**Inguinal** (found in the groin)

3) The lymphatic system helps to keep **fluid** levels balanced. It also helps to defend against **infections.**

4) **Lymph**: a clear, watery fluid that contains protein, salt, glucose, urea, and other substances.

5)The spleen is located **under** the ribcage in the upper **left** part of the abdomen. It helps to clean out **old** red-blood cells and foreign substances.

6)The lymphatic system helps to fight against **germs** and bacteria.

7)**Lymph Node**: mass of tissue that contains lymphocytes (white blood cells).
