

# Our Urinary System

1) The functions of the urinary system include:

\_\_\_\_\_ a balance of water, salts, and acids in the body.

\_\_\_\_\_ blood as it flows through the kidneys.

Filtering out \_\_\_\_\_ products.

\_\_\_\_\_ waste products to urine.

2) \_\_\_\_\_ is the medical term used when talking about the kidneys.

3) If your kidneys do not work properly, \_\_\_\_\_ build up.

4) Waste from \_\_\_\_\_ goes into the kidneys.

5) Blood goes in the kidneys via the \_\_\_\_\_  
\_\_\_\_\_.

6) \_\_\_\_\_ are tiny filters in the kidneys.

7) Everyone must have \_\_\_\_\_ functioning kidney.

# Our Urinary System

1) The functions of the urinary system include:

**Maintaining** a balance of water, salts, and acids in the body.

**Filtering** blood as it flows through the kidneys.

Filtering out **waste** products.

**Converting** waste products to urine.
